

200 North West Davis Trail Crossing

The Problem

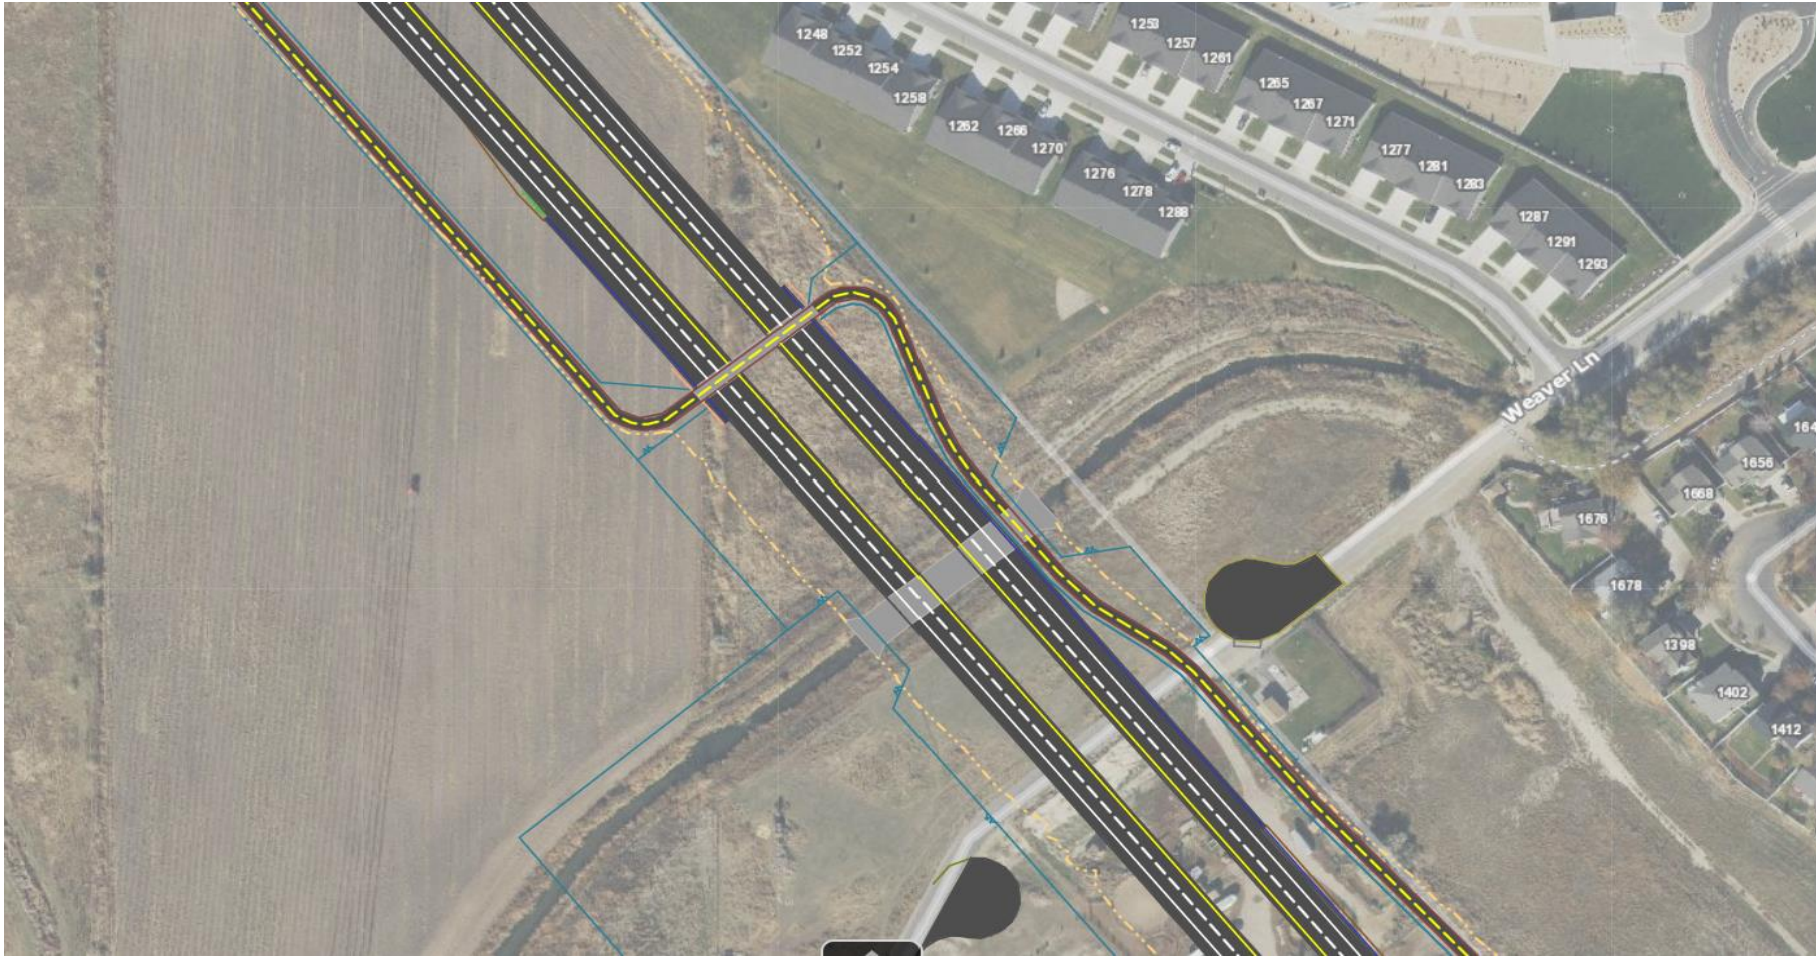

- ▶ The West Davis Trail crossing at 200 North is designed at grade.
- ▶ Both Kaysville City and Davis County Planning believe this will cause pedestrian/vehicle conflicts.
- ▶ The trail will be busy right out of the gate.
- ▶ 200 North will just get busier as time goes on.
- ▶ There are no traffic signals planned at the intersection.
- ▶ This trail system will be owned and maintained by the County when it is finished, if it is not resolved now with UDOT's help, it will become the County's sole problem in the future.

Solutions

- ▶ Install a box culvert under the road to accommodate trail users.
 - ▶ UDOT estimates approx. \$2.5 million
 - ▶ UDOT says ground water could be an issue.
- ▶ Install a bridge structure over the road.
 - ▶ UDOT estimates approx. \$5 million
- ▶ Move the overpass at Weaver Lane south of 200 North interchange.
- ▶ It will be far cheaper to solve now rather than wait for complaints or accidents.
- ▶ Kaysville City has committed \$250k.
- ▶ Consider committing \$1m from prop. 1 funds.

Gentile Issue

- ▶ We have the same problem at Gentile Street.
- ▶ The trail dead ends at a round about with no provision to get across Gentile Street.
- ▶ We have reached out to Syracuse to address this issue.
- ▶ Consider appropriating another \$1m to help this site.
